

EXPERTISE THAT CHANGES EVERYTHING

Founded over 50 years ago and 100% Canadian owned and operated, Bee-Clean Building Maintenance is Canada's largest janitorial services provider.

As an industry leader and a provider of turnkey services in the maintenance, restoration, upkeep and cleaning of buildings, we were obliged at the very start of the current crisis to rapidly adopt new intensive sanitation standards to help counter the spread of the COVID-19 virus.

Since the beginning of March, a new work structure was designed and implemented all across the country. Its aim is to intensify the frequency of cleaning and to provide intensive sanitation standards to help counter the spread of the virus, and thus ensure complete effectiveness in disinfecting surfaces that pose a risk of propagation. Targeted surfaces include washroom countertops, faucets, door handles, elevator buttons, staircase handrails, glass office partitions, etc.

In response to these new measures, we now have a range of custom-designed products. Our supply chain has been secured for both these products and an abundance of personal protective equipments. All employees have received specialized training in order to ensure their protection and the rigorous application of these new measures.

BEE-CLEAN ALSO OFFERS ITS CLIENTS CONSULTATION SERVICES TO HELP THEM MEET CERTAIN SPECIFIC CHALLENGES RELATED TO THE CURRENT CONTEXT.

We are very proud of our employees who face the inherent risk of the virus every day, ensuring that clients, employees and visitors who use the buildings under our responsibility are in a safe, secure and functional environment.

We wish to thank them for their excellent work, as it is part and parcel of the solid reputation of Bee-Clean across Canada.

To optimize the maintenance of your buildings and ensure healthy and safe environments throughout the coming months, do not hesitate to call on our experts. We are at your service and we can help you..
